Preface

International Conferences provide an excellent opportunity to bring together academics from different countries and backgrounds for the purpose of presenting their research results, critically discussing methodology and findings and improving the quality of research and the impact of the research on society and science. Furthermore, conferences enable the scientific community to create new networks, to foster relationships and extend their visibility.

The 2nd Global Conference on Business Management and Entrepreneurship (GCBME) 2017 is an annual conference co-hosted by Department of Management, Faculty of Economics & Business, Universitas Airlangga and Business Management Education Program, Faculty of Business and Economics Education, Universitas Pendidikan Indonesia. The theme of GCBME 2017 is increasing management relevance and competitiveness.

The theme inspired by the concern of Sumantra Ghoshal that bad management theories are destroying good management practices. Before that, the dichotomy between rigor and relevance is always becoming a hot topic in the management field. This conference aims to answer the following question: How might we accomplish a reconciliation of rigor (academic) and relevance (practitioner) standards to offer organizational competitiveness?

I expect this conference raises two important things in the discussion room and proceedings (based on Corley and Gioia, 2011): First, theories used in this conference should be problem driven—that is addressing a problem of direct, indirect, or long-linked relevance to practice, rather than narrowly addressing the (theoretical) “problem.” Second, the fact that we are a profession (academia) studying another profession (management), therefore it needs balancing between theoretical contribution managerial implications. By doing that, I believe that our research and discussion in this conference could offer something useful for practitioners (thus increase its competitiveness) while at the same time contribute to the development of our management field.

I am looking forward to seeing you in GCBME in the near future.

With warmest regards,
Prof. Badri Munir Sukoco, PhD
GC-BME 2017 Conference Chair

ABSTRACT: Purpose—This study aims to combine the literature on green business and sustainability of batik business into management and organization framework. This research seeks to build and to elaborate the relationship of anthropological business problem, green knowledge, green management and green organization. Design/methodology/approach—The research focuses on Indonesian entrepreneur who have the experience of information of batik business and their green knowledge. This study undertakes an anthropological study by means of observation, interview and documentation method. The informant is chosen by purposive sampling technique. Findings—The paper finds that the extant literature in the field of business and management heavily concerned green knowledge practices within Small and Medium-sized Enterprises (SMEs). Originality/value—The paper is benefit to academics and managers to consider green knowledge when they meet environment challenge. Since sustainability is important to all SMEs, to enhance understanding of when and how to cope with green management and green organization as green knowledge consequence is necessary. Paper Type: Research paper.

Keywords: business, green knowledge consequence, green management and green organization

1 INTRODUCTION

The enterprise’s sustainability depends heavily on the capability of the enterprise’s manager in adapting with the environmental changes tend to be uncertain (Lee, 2009). The business environment become a big issue which continues to cling to enterprises management, both on large scale enterprises and small and medium scale enterprises. This business challenge could mean change for both the organization and management (Georg & Fussel 2000; Harris and Crane, 2002).

2 ORGANIZATIONAL LEARNING

The discussions about organizational learning (OL) have kept developing during the last few years, especially concerning dealing with business challenges (Hooper, et al. 2000; Hansen, et al. 2005; Rome & Wijen, 2005). Cognition or aspects of understanding for the first time indicate a contact for entrepreneurs who face challenges. This makes behavior aspect to be a response form towards a business issue. Sometimes, both aren’t sequentially happen, and even contrary. There are times when business response occurs reflexively and there are times when it is a continuation of learning outcomes (Fiol and Lyles, 1985).

3 GREEN KNOWLEDGE

Knowledge is very important especially when human have to make a decision that involves many factors: mental, cultural, theoretical models which are all come from the human experiences that are generally involved in an organization. Resource efficiency become a central issue since the industrial
world is confronted with the depletion of various resources and also the emergence of a number of problems resulting from the industrial environment itself. Resources consist of capital/financial, labor, technology, as well as the business environment change challenge such as market orientation, consumer satisfaction, business competition techniques, environment pollution. The combination of these various condition become a requirement for a businessman when making a business orientation change. A number of indicators for knowledge about management get appreciated and drive businesses toward sustainability (Millard, 2011). Various methods to efficient business have achieved a lot such as replacing materials with the environment friendly ones, in line with green movements, as well as replacing techniques with faster ones and ones with a lower pollutant level.

4 METHODOLOGY

The location of this research is Pekalongan City, Central Java. The research subjects are Batik SMEs taken one from each in Java. This study is a qualitative study using phenomenon approach and case studies in Pekalongan City. The method used is descriptive, meaning that researchers provide overview systematically, factually and accurately on the facts and the characteristics of certain populations. The case study method is also used in this study in order to analyze and describe the environment and interaction environment of organizations such as Batik SMEs.

The analytical tool used as a source of analysis in this study is phenomenon approach. The phenomenon approach used as a basis for determining some of the functions that are supposed to encourage the performance of Batik SME in Pekalongan City. Central Java, which uses natural dyes produced from leaves, roots, and certain shaved wood phenomena encountered. This research is classified as empiric-rational-inductive research.

The primary data are obtained from the field while the secondary data are obtained from journals and official reports about the number of SMEs.

5 RESULT

The information obtained showed that the batik industry was also experiencing various business turbulences. Much research has been conducted done and verified that Green human resources, which states that one's leadership in managing enterprises and organization's members are vital in making a number of enterprise innovations (Chen, 2011). With regards to the price, motif, expensive material, market orientation, competition, etc., basically, those conditions becoming a common dilemma, because the sustainability of the batik industry has been counterproductive with the waste it generates. The more dynamic the batik business is, the more chronic the waste it generates. The poor environment coupled with water contamination on both color and odor, makes the society, government, and businessmen conduct experiments to switch to natural dyes. The environment pollution level because of batik waste is quiet unsettling because of the used chemical dye chemical contents. Among the natural dyes used are: Turmeric (Curcuma domestica val), the part used are its rhizomes and root tubers which can produce yellow dye. Seng plant (Caesalpinia Sapapam Lin), the part used is its tree bark to produce red dye. Tanger (Ceratops Condollosa), jambul (Peltiopheran pterocarpum); tegeran (Cudronia javanensis), the part used are its tree bark and wood to produce soga dye on batik. Shallot (Allium Ascalonensis), the part used is its outer skin to produce brownish orange dye. Minosa (Minousa Fulica), the part used are its flowers and leaves to produce greenish yellow dye. Coconut (Cocos Nucifera), the part used are its coconuts husk to produce brownish beige dye. Andong (Candyleline Fuliosa Backer), the part used are its leaves to produce green dye. Noni (Morinda Citrifolia), the part used is its root to produce red dye. Mango (Mangifera Indica Lin), the part used is its tree bark to produce green dye. Indigo (Indigofera Tinctoria), the part used are its leaves and tree branches to produce blue dye. Teak (Tectona Grandis L), the part used are its young leaves to produce brownish red dye. Tea (Camellia Sinensis), the part used are its old leaves to produce brown dye. Avocado (Persea), the part used are its leaves to produce brownish green dye.

The batik consumer's orientation has shifted to natural dye batik. It is understood that the go green movement in both local and overseas consumer has affected the batik consumer's interest. Since nature conservation came to the world's attention, in batik industry the switch from synthetic dye to natural dye is the solution. Five main principal of environment friendly dye concept are: Rethink, where businessmen rethink when are going to keep using non environmental friendly materials. This includes resource conservation such as fabric, wax, and other materials as the fuel to melt the wax. Reduce, which reduces the water contamination after the use of natural dye. Besides to reducing the pollution, the amount of synthetic dye consumption can be reduced when batik businessmen use leaves/roots/fruit peels which are often discarded. Recovery, which is polluted environment recovery. Today, the attention towards the existence
of Waste water Treatment Plant (WWTP), is not the responsibility of the Pekalongan City government alone, but also the home industries, or also known as individual WWTP. From the waste treatment plant before released to a river, the waste is first processed to eliminate pollutant levels. Reuse, which is achieved by innovating residues. Some of batik businessmen have already applied by turning cement paper, wood, coconut shell, and jeans fabric into batik media. Recycle, by recycling wax residues to be reused.

On the technical side, the batik business in Pekalongan is also innovative. Previously, batik is processed by two main techniques, which were written and stamped, or combined. Both techniques require a great deal of time, so that the market demand often cannot be supplied in a short period of time. On the marketing side, efforts are made both through various national scale exhibition events such as Pekan Batik Nasional (PRN) and an international scale exhibition, which is the International Pekalongan Batik Week. Since Pekalongan City is inaugurated as The World City of Batik and Creative City by UNESCO, the interest from both society and businessmen towards batik has increased. The Pekalongan City local government in cooperation with the central government has developed the batik business through series of programs that are applied by an institution which called the Pekan Kerajinan Nasional Daerah (Dekranasda) or Regional National Crafts Council together with the ministry of industry and trade.

6 DISCUSSION

Innovation is often interpreted as something done by the company to add value, both directly for the business and indirectly for the consumer, with a dual purpose, which is to make the consumer satisfied and loyal, and also to maintain the existence of the business (Kamaruddien, et al. 2009; Gibbon et al, 1994; Lyons et al., 2007; Dembowski, 2013). From the Green Knowledge typology, the belief that comes from the Giver of Belief makes human sure about the happenings, including in business, and forms a positive mindset. The term green refers to a situation that is secure, pleasant, peaceful, co-operative, tolerant, mutual respect, and the need for each other (coexistence). These values are often become the basis of a green innovation, in order to both respond the environment and as a proof of the business' proactive attitude to maximize its profit and efficiency (Wong, 2012; Johnstone et al., 2010, Porter and van der Linde, 1995). For a businessman, efficiency became the next green innovation orientation. Doing the right thing, became a principle of every business needed to fulfill the organization and consumer’s needs. The urge to survive and provide the consumer’s needs become the main motivator, while in the same time they have to be wary of the demands for environmental safety. Often, environmental damage; pollution, health, social-cultural level are related with industry. The environment safety standard such as energy saving become a reference of a production process and urges the production process to adapt by applying process development and innovation (Chiou et al. 2011; Eggers, et al., 2013). Individual greening occurs because a person experiences environmental awareness. Green organizations also play a role in the operation of green knowledge.

Human self-awareness, as a part of other human communities, supports mutual respect, esprit de corps, mutual care, and the need for relationships with each other.

7 CONCLUSION

Industry is often placed face-to-face with environment, includes relation and consumer. Although the industry as an organization would be a relation and a consumer for the environment. The term green is the businessman’s way to accommodate the knowledge is in the form of both parties co-operative relationship or interplay. The batik industry is inversely proportional with the environment condition. The presence of pollution that is not keep occurring, encourages the government and businessmen to innovate to minimize the negative impact, while in the same time increasing the resource efficiency. The innovating attitude in the green knowledge theory is a result of organizational learning process, both as a proactive response and action. The green knowledge principle that based on peaceful situation, tolerant, partnership, and care, stimulates the businessmen to have a change in both management and organizational relationship in their work team.

Dear Conference Delegates,
I would like to extend a very warm welcome to all of you to joint conferences in Nagoya, Japan, organized by the Higher Education Forum (HEF).

Nagoya is located at the center of Honshu (the main island of Japan) and has a long history dating back 1900 years, when Atsuta Jingu (one of Japan’s most important Shinto shrines) has a close relationship with the legendary people who appear in Kojiki (the oldest history book of Japan), was established. Nagoya is the birthplace of three notable feudal lords, Oda Nobunaga, Toyotomi Hideyoshi and Tokugawa Ieyasu, and developed as the castle town of the Owari, one of the three branches of the ruling Tokugawa family during the Edo Period (1603 - 1867). Nagoya plays an important role in Japan's industrial society. The Toyota Motor Corporation, a global automotive industry leader, maintains its headquarters just outside of Nagoya. Today, Nagoya continues to draw attention and keeps on developing as a Japanese international city.

Nagoya has many famous attractions to entice the keen traveler, including Nagoya Castle (one of Japan’s Three Famous Castles), Atsuta Jingu, and Osu Kannon Temple (a popular Buddhist temple in the heart of the city).

Nagoya is home to arguably some of Japan’s best food as well. It has always been a popular destination for people in the know with some of the country’s best and most interesting culinary delights, such as Miso Katsu (Deep fried pork cutlet topped with a thick miso sauce), Tebasaki (Deep fried spicy chicken wings), Miso Nikomi Udon (an udon that’s stewed in a miso based broth with hatcho-miso), Ankake Spaghetti (spaghetti topped with a spicy and sticky sauce), Tenmusu (A rice ball containing shrimp tempura).

Enjoy this opportunity to both share your research and experience Nagoya!

Michiko Miyamoto
Local host
Professor, Akita Prefectural University, Japan
General Information for Participants

■ Registration
The registration desk will be situated on the 2F of Building 2 at the Nagoya Congress Center during the following time:

08:30-16:00 Thursday, March 30, 2017
08:30-14:00 Friday, March 31, 2017

Lunch Venue: Cafeteria Cascade on B1F of Building 3

■ Organizer
Higher Education Forum (HEF)
Tel: +886 2 2740 1498 I www.prohef.org

■ A Polite Request to All Participants
Participants are requested to arrive in a timely fashion for all addresses, whether to their own, or to those of other presenters. Presenters are reminded that the time slots should be divided fairly and equally between the number of presentations, and that they should not overrun. The session chair is asked to assume this timekeeping role and to summarize key issues in each topic.

Sandals or Slippers
Tank Top
Shorts
Preparation for Oral Presentations

All presentation rooms are equipped with a screen, an LCD projector, and a laptop computer installed with Microsoft PowerPoint. You will be able to insert your USB flash drive into the computer and double check your file in PowerPoint. We recommend you to bring two copies of the file in case that one fails. You may also connect your own laptop to the provided projector; however please ensure you have the requisite connector.

Preparation for Poster Presentation

Materials Provided by the Conference Organizer:
1. X-frame display & base fabric canvases (60cm x 160cm)
2. Adhesive tapes or binder clips

Materials Prepared by the Presenters:
1. Home-made Poster(s)
2. Material: not limited, can be posted on the canvases
3. Recommended poster size: 60cm x 160cm

A 60cm x 160cm poster illustrates the research findings.

| 1. Wider than 60cm (left) |
| 2. Copy of PowerPoint slides in A4 papers (right) |
| ☺ |

Abstract:
With the entrance of the Association of Southeast Asian Nations, there has been a strong initiative for innovation. The size of ASEAN is projected to have a combined GDP of $3.5 trillion by 2020 and projected to rank as the 5th largest economy in the world. With over 125 million consumers and a projected populations in 2020 of 800 million people, there is much potential for innovation, impact, and social change. ASEAN Impact Challenge is a regional challenge designed for impact-driven innovators within the ASEAN region. The initiative is open to innovations with the potential and capacity to develop and scale, while providing long-term solutions and impact on pressing community, social and environmental issues around the theme of Innovations for Urban Impact. We will discuss the ASEAN ecosystem and the opportunities for innovation over the next ten years.

Brief Introduction of Dr. Donald L. Amoroso
Dr. Amoroso is the Lowder-Weil Endowed Chair and Professor of Innovation and Strategy at Auburn University Montgomery, Alabama, United States. He is Visiting Professor and Research Fellow at Asian Institute of Management in Manila, Philippines and Palawan State University, Philippines. He has been Visiting Professor at Tsukuba University, Japan, Addis Ababa University, Ethiopia, and Australian Defence Force Academy, Canberra Australia. His industry experience includes working in General Electric Capital as Assistant Vice President and Director of Enterprise Solutions, with Solista/GartnerGroup as a consulting partner, and with Northrup-Grumman in finance. He worked with the Center for the Commercialization of
Advanced Technologies (CCAT) in Washington D.C. and San Diego where he led over 24 innovation projects and assisted in the start up of 14 new companies. Dr. Amoroso received his MBA and Ph.D. from the University of Georgia in 1984 and 1986, respectively.

In research, Dr. Amoroso is conducting a five-year project studying consumer intention to adopt mobile wallet applications in different ASEAN ecosystems in Southeast Asian countries, Japan, China, and Korea. Dr. Amoroso is working with colleagues at twelve Japanese, fifteen Chinese, and six Philippine universities to understand innovation processes in organizations, in addition to consumer adoption. Dr. Amoroso has been on the editorial board of key journals and has written five books, published in 121 refereed academic journals and over 70 conferences in the past 30 years.

In consulting, Dr. Amoroso is Founder and CEO of Axcell LLC Consulting Group, with over 25 years of consulting, mentoring, seminars, and facilitation in the spaces of leadership, innovation and strategy. Organizations that want to break the competitive boundary in their industry consult with Dr. Amoroso, especially in the area of big data and analytics, innovation and design thinking, and strategic planning with Blue Ocean Strategy. He coaches and mentors over 65 executives and has been working with organizations to establish portfolio management offices (PMO) and has mentored 207 aspiring CIOs in multiple countries.

Abstract

The primary purpose of this paper is to explore the role of ritual dimension of consumer behavior and religion in innovation in family firm organization. There is no doubt that the economic life of Pekalongan city based on batik creative industry has become a tradition in the life of the people, passed down from generation to generation. Thus Pekalongan is widely known in Indonesia as the Batik City. The presence of various economic infrastructures such as batik market, batik villages and batik galleries all over the city, confirms that the economic life of the city is based on the art, craft and culture of batik. The batik exports were mainly to Malaysia, UEA and Thailand. In 2009, batik cultural heritage was officially recognized by UNESCO through the decision of the 4th Meeting of the intergovernmental Committee for Safeguarding the Intangible Cultural Heritage in Abu Dhabi UAE on 2nd October 2009.

This paper built with a number of interesting facts. First, batik becomes an important industry in order to creating jobs and revenue for society. Second, most of the batik industry is family business. Third, ritual dimensions of consumer behavior affect the batik trading. Fourth, the sustainability of family firm organization of batik depends on innovation of batik product itself. This article makes three main contributions. First, we apply the ritual dimension of consumer behavior and its influence in level of batik trading. Second, batik sales depend on consumer tastes. Third, by investigating consumer behavior, and religion affected on it, this study draws the need of innovation in family firm organization. This paper consider that value drive man to innovate their production by creating “new” objects. Then, the understanding of subjective and intangible value, namely religious and culture become an important to consideration in order to learn the relationship between consumer and innovation behavior.

We will shed light on ritual dimension of consumer behavior (RDCB), religion (Re) and their interrelationship to look closely in family firm innovation (FFI). There are
more than 800 batik industries in Pekalongan City, Central Java. The descriptive analyze were used in this study. This paper assumed that consumption behavior affected by the value. When they make the decision to consumption, also based on value. Generally, they determine the value of product by the quality, uniqueness, and utility. Sometimes, the values depend on a quality of object, but sometimes depend on uniqueness, on its utility or any combination between them.

This research found that in batik industry, homo moralis or homo sosialis is going on the basis of the relationship between the worker and employer. The work climate that constructed at their place affects the enthusiasm to create new motif, new design because the worker feel happy and unstressed. Human resource should be innovation in every time as well as possible. The interaction between values and performance of organization similar with the new institutional theory which emphasized the importance of cultural factors in understanding the business as organization and innovation, especially intangible innovation.

The batik industry as cultural values form of the source of the behavior that's cultural rites of passages, especially in performances experience festivals such as Pekalongan batik carnival or international batik week, also in the marine charity event, marriage, death ceremony, and so on. More, this study try to understand the batik industry as a business negotiation which based on group learning that cover the family firm and consumer.

The results show that consumer behavior means ritual experience and religion associated with the innovation of batik industry as a material and cultural heritage. The value, religion and culture have an important role into the family firm. The relation helps to learn about of the modifying of batik production. The interaction between values and performance of organization similar with the new institutional theory which emphasized the importance of cultural factors in understanding the business as organization and innovation, especially intangible innovation.

Keyword: ritual, consumer behavior, religion, innovation, family firm.

A. Background

Batik industry in Pekalongan City has become a tradition in the life of the people, passed down from generation to generation. The presence of various economic infrastructures such as batik market, batik villages and batik galleries all over the city, confirms that the economic life of the city is based on the art, craft and culture of batik. This paper consider that value drive man to innovate their production by creating "new" objects. The understanding of subjective and intangible value, namely religious and culture become an important to consideration in order to learn the relationship between consumer and innovation behavior.
This article makes three main contributions. First, we apply the ritual dimension of consumer behavior and its influence in level of batik trading. Second, batik sales depend on consumer tastes. Third, by investigating consumer behavior, and religion affect on it, this study draws the need of innovation in family firm organization. Our study has the opportunity to inform the wider on family firm research. Ritual behavior often involves the extensive exchange of goods and services, which are often consumed at dramatic, ceremonial or even solemn occasions. The resulting literature sparked intense interest in consumer research that highlighted the cultural and social complexities of consumptions (Joy and Li, 2012, p. 142).

From the table 1, the batik amount always to develop and bigger in every year. Batik industry as a company always seek a good product as a mainly factor to give a satisfaction for the consumer. There are many options that can be chose to get a high competition. Innovation of batik motif, clothing, coloring, marketing and others should be need as fast as possible. The consumer behavior has a relationship with producer innovation. More innovative, there is more profitable. It seems reasonable to assume that innovation in the economic subsystem, especially at the organizational level, is driven by the desire to make profits (Johannessen, 2013, p. 1211).
Religion's contribution to society is a formalized structure in which humans help one another connect with God and, in so doing, explore and respond to the divine within themselves and others. Moreover, the concepts of economic institution and economy activity are merely useful abstractions for describing human interactions (Davies, 2004, p. 38 & 39). Taken together, religion has been a significant force in the lives of many individuals, its role in consumer choice can be characterized as unclear or "fuzzy" (Delener, 1994, p. 36).

Consumption itself, as a process whereby agents engage in appropriation and appreciation, whether for utilitarian, expressive or contemplative purposes, of goods, services, performances, information or ambience, whether purchased or not, over the agent has some degree of discretion (Warde, 2005, p. 137)

Many literatures have placed a lot of attention to the issue of consumption, religion and innovation. Previous research has stressed that consumers with a high degree of cognitive religious commitment viewed sales personal friendliness, shopping efficiency and product quality as being of greater importance in selecting a retail store than did those low in cognitive religious commitment. Muslim consumers, their findings suggest that there is no difference in consumer shopping behavior between devout and casually religious Muslim consumers, except for the trendy shopper type (Mokhlis, 2009, p. 78). Published research about human ritual experience comes primarily and traditionally (Rook, 1985, p. 251). The consumer decision and being a user connected to how much innovation to be done.

The consumer determine the value of product by the quality, uniqueness, and utility. Sometimes, the value depend on a quality of object, but sometime depend on uniqueness or on its utility or any combination between them. The behavioral economics has also been successfully combined with the analysis of behavior in general as well as with applied behavior analysis in human contexts (Foxall, 2013, p. 231).

B. Methods

This research used a qualitative research method. The primary data was collected with semi-constructed interviews batik producer, consumer and local
government through the observation and documentation. We also used relevant international academic journal of consumer behavior, religion and innovation in family firm. The thematic analysis was used to identify the construction of contribution the ritual of consumer behavior and religion in innovation. The primary and secondary data were triangulated through combining the literature review, industry reports and the key issues about relation between religion and consumer behavior.

C. Results

**Ritual dimension of consumer behavior**

Indeed, the ritualization of the consumptive experience may better explain some purchase behavior than attitudinal variables such as identification or motivation. Below, we discuss three dimensions in family firm influence that we chose to examine. First, ritual dimension of consumer behavior, second religion and its influence on behavior consumption and third, innovation in batik family firm. Ritual is body language that functions like a natural symbol, facilitating interpersonal interactions (Rook, 1985, p. 252). Rituals often make life better (Vohn, 2013, p. 1719). It’s first necessary to identify the sources of behavior and meaning, there are human biology, individual aims and emotions, group learning, cultural values and cosmological belief.

The batik industry as cultural values form of the source of the behavior that cultural rites of passages, especially in performances experience festivals such as Pekalongan batik carnival or international batik week, also in the marine charity event, marriage, death ceremony, and so on. More, this study try to understand the batik industry as a business negotiation which based on group learning that cover the family firm and consumer.

Figure 1.
Theoretical Framework

Rituals mark life event, big and small. Rituals play a particularly prominent role in ancient and modern occasions for consumption. Rituals can enhance consumption (Vohn et, al (2013, p. 1714-1715). Moreover, ritual are an important part of society, and are a frequent topic of investigation among sociologists and anthropologists (Neale et.al., 2008, p. 1).

Religion and Its Influence in Behavior Consumption
Religion is one of the more frequently mentioned determinants of the moral values that underpin ethical standards (Emerson & Mckinney, 2010, p. 2). Religion, being an aspect of culture, has considerable influence on people's values, habits and attitudes, and it greatly influences lifestyle, which in turn affects consumer decision behavior (Delener, 1994, p. 36). Religion represents a potentially significant element in many, if not all, the problem-solving and decision making phases (Delener, 1994, p. 39), include in consumption decision.Beliefs, norms and value systems can influence the members of the community to behave and act in a particular way considered acceptable by the other members in the group (Rashid and Ibrahim, 2008, p. 908).

Differences in religious affiliations tend to influence the way people live, the choices they make, what they eat and whom they associate with. It would seem that obtaining an in-depth understanding of the dominant religion and its effect on consumer behavior would be essential to an intimate understanding of consumer choice in a particular context. Religious belief is a significant factor in influencing consumption behavior because of the rules and taboos it inspires. Furthermore, religiosity represents an inherent human value which tends to be stable over a fairly long period of time, and finally many elements of religiosity are observable, and therefore of pragmatic value to marketers. Religion recognizes the divinity of the human being in an economy when it advocates free competition, protection of property rights and encourages people to share and behave well toward one another (Davies, 2004, p. 37).

The Impact of Religious on Innovation in batik family firm.

The family can be both a help and a hindrance to the firm, and that the various dimensions of family influence impact the effectiveness of family firm innovativeness in terms of firm performance (Kellermans et.al, 2010, p. 1 &2).The study of innovative behavior in family firm is essential since the firms are governed by a set of unique set of norms, cultures and processes. Understanding how family influences can help or hinder a family firm's ability to exploit its innovativeness is important, since innovation helps to renew companies, enhance their competitive
advantage, spur growth, create new employment opportunities and generate wealth (Hayton & Kelley, 2006, p. 407). Innovation is the establishment of new concepts, procedures and/or technologies in an organization (Krauss, et.al. 2011, p. 3; Johannessen, 2013, p. 1195).

Figure 2. Innovation in Family Firm

Figure 2 show that innovation in the family business is a dependent variable that is influenced by two types of factors: internal and external independent variable. Individual commitment, decision making of single individual, financial performance and business experiences all include in internal factors. While consumer demand and market competition could be external factors, and have a great influence to push the role of innovation in family firm. The two factors simultaneously influence the behavior of innovation, for all dimensions: financial management, strategy, price,
packaging, promotion, human resource, development of process, utility, size, models and motif of batik. The willingness to adapt the economic change by innovation helps the batik entrepreneur to reach out the long term orientation.

Organizational innovations are related to new ways of managing organizations, as well as new business models. Historical examples of organizational innovations that have had great political value in the area of trade and business are the introduction of joint stock companies and cooperative movement. The cultural innovation are related to norms, values, habits, expectations and new ways of thinking; new ways of thinking relate to ideology (Johannessen, 2013, p. 1196 and 1198).

The work climate that constructed at their place affects the enthusiasm to create new motif, new design because the worker feel happy and unstressed. The interaction between values and performance of organization similar with the new institutional theory which emphasized the importance of cultural factors in understanding the business as organization and innovation.

The firm’s activities are determined not only by its physical resources, but also by the firm’s ability to use those resources. The resources of each firm may be deployed according to the routines of its employees, that is, according to the of heuristics that the firm has built up over time as efficient ways of undertaking common activities (Robertson and Yu, 2001, p. 185).

The values come from their belief, its religion beside their culture that they have since live before. Religion is concerned with man’s relations with God, and with man’s belief in the supernatural. It has great impact on nearly every human society because of the commonly shared belief that discovery of truth comes through revelation by supernatural power. In its organized form, religion also impacts business organizations (Chusmir & Koberg, 1988, p. 251). If a company has composite information about manifestation patterns for faith and work integration, it may bring many potential business benefits, including increased diversity and inclusion; avoidance of religious harassment or discrimination claims, respect for people of different faith traditions or worldviews, and possibly a positive impact on ethics programs, employee engagement, recruiting and retention (Miller & Timothy,
2010, p. 55). In Islamic view, the fatalism and non-fatalism or adoption to innovate or to change are the same meaning in case of the kind of value related to adopt the innovation. This result can be learn in Figure 3.

D. Conclusion

In batik industry, there is a strong connection in relation between producer values such fatalism and nonfatalism with consumer decision to consumption that also based on value. The relation helps us to learn about of the modifying of batik production. The motif, color, design, marketing strategy, management human resource, and many sides that need more to innovation. This paper analysis showed that the value understanding can help to explain consumers’ innovation adoption. This paper found that innovation also applied in batik SMEs, include motif, design, material, strategy marketing and developing industry. This innovation required the individual’s think; organizational and managerial innovation as well as economic (tangible) and social-cultural (intangible) innovation.

KATA SAMBUTAN REKTOR

Assalamualaikum Wr. Wbr.

Forum Manajemen Indonesia ke 6 (FMI 6) dengan kegiatan seminar dan call for paper yang diselenggarakan oleh Departemen Manajemen Fakultas Ekonomi dan Bisnis Universitas Sumatera Utara di Medan ini, sangat saya apresiasi karena mempunyai tujuan untuk meningkatkan pengetahuan dan wawasan khususnya pada bidang entrepreneurial management yang dapat digunakan untuk menghadapi persaingan akibat dampak globalisasi terutama dengan adanya Masyarakat Ekonomi ASEAN.

Untuk memenangkan persaingan ini diperlukan implikasi bagi sebuah perusahaan seperti konsep-konsep manajemen, keterampilan, pola pikir dengan fleksibilitas yang tinggi, inovasi dan responsif serta pengetahuan kewirausahaan di berbagai lapisan manajemen. Kreatifitas dan inovasi dikembangkan untuk dapat mengembangkan produk baru, yang unik dan mempunyai nilai tambah (value added) bagi perusahaan ataupun organisasi.

Selain itu, transformasi bisnis yang semakin cepat dan terus menerus berkembang membutuhkan manajemen yang dinamis meliputi keseluruhan aspek manajemen bagi perusahaan ataupun organisasi. Aspek tersebut diantaranya meliputi bidang manajemen penasaran, manajemen sumber daya manusia, manajemen keuangan dan kewirausahaan.

Saya berharap dengan adanya kegiatan ini dapat memberikan perubahan dan paradigma khususnya bagi para akademisi, praktisi, pengusaha, mahasiswa dan masyarakat luas sehingga dapat menciptakan visi, misi maupun strategi dalam menghadapi perubahan lingkungan bisnis di masa yang akan datang.

Terima kasih terhadap para peserta yang telah hadir dan mengikuti acara FMI 6 yang diselenggarakan di Medan ini. Semoga para peserta mempunyai kesan yang baik terhadap acara ini.

Wassalam,

Rektor Universitas Sumatera Utara

Prof. Dr. Dr. Syahril Pasaribu, D.TM&H, M.Sc. (CTM), Sp.A(K)
Assalamualaikum Wr, Wb

*Entrepreneurial management* sebagai praktek tentang kreativitas dengan memanfaatkan efisiensi dan efektivitas dalam mengelola sebuah organisasi. Manajer terlibat secara langsung dalam dinamika yang sangat kompleks antara ilmu manajemen dengan strategi bisnis. Istilah *entrepreneurial management* telah diperluas mencakup konsep kewirausahaan sebagai pola pikir sebagai inisiatif kewirausahaan dalam bentuk kewirausahaan sosial, kewirausahaan politik atau kewirausahaan pengetahuan.

Saya berharap dengan berlangsungnya acara ini dapat memberikan kontribusi yang positif dalam perkembangan konsep dan praktek *entrepreneurial management* khususnya bagi pelaku bisnis Indonesia. Akhir kata, terima kasih kepada para peserta telah hadir dan mensukseskan acara Forum Manajemen Indonesia di Medan ini.

Wassalam,

Dekan Fakultas Ekonomi dan Bisnis Universitas Sumatera Utara
KATA SAMBUTAN

Assalamualaikum w7, wB

Forum Manajemen Indonesia ke 6 yang dilaksanakan di Medan ini merupakan kegiatan yang diikuti para peserta yang berasal dari akademisi Fakultas Ekonomi seluruh Indonesia. Adapun tema dalam kegiatan ini adalah entrepreneurial management. Tujuan dari tema ini adalah sebagai kontribusi dalam pengembangan entrepreneurial management yang menggabungkan seluruh konsep manajemen dan kewirausahaan dalam pengembangan dan peningkatan jumlah pelaku bisnis, peningkatan kualitas pelayanan dan produk yang dihasilkan serta strategi penasaran dalam menghadapi peraingan yang semakin ketat khususnya dalam menghadapi MEA (Masyarakat Ekonomi Asean) tahun 2015.

Pergaulan bisnis merupakan sesuatu yang tidak mungkin dihindari dalam kegiatan manajemen baik yang melibatkan pelaku UMKM dan pelaku bisnis skala besar. Untuk itu diperlukan konsep-konsep manajemen yang dapat menghadapi tantangan dari pelaku bisnis domestik maupun Internasional. Konsep-konsep ini harus merupakan konsep yang lahir dari penelitian yang baru dan berkualitas dari para akademisi yang dapat diterapkan kepada pelaku bisnis tersebut.

Kami dari panitia FMI 6 sangat mengharapkan kepada para peserta untuk dapat berperan aktif dalam memberikan ide-ide, konsep-konsep baru dan pengalaman untuk dapat secara bersama-sama memberikan kontribusi dalam mewujudkan transformasi, strategi dan inovasi bagi kemajuan ilmu manajemen di Indonesia.

Acara Seminar Nasional dan Call For Paper ini diikuti oleh berbagai Universitas yang ada di Indonesia dengan jumlah Paper 268 Paper. Yang terdiri dari:

- Manajemen Strategi : 13 Paper
- Manajemen Kewirausahaan : 50 Paper
- Manajemen Operasi : 16 Paper
- Manajemen SDM : 51 Paper
- Manajemen Umum : 16 Paper
- Manajemen Pemasaran : 60 paper
- Manajemen Keuangan : 62 Paper

Wassalam,

Ketua Panitia,
Dr.Isfenti Sudalia,SE.,ME

Abstract

This paper pays attention to succession as a process in family business management sustainability. This paper is summarized from research on 2012-2013. Especially in small-medium batik industry, succession becomes crucial step which is influence the growing of industry. In this paper, the sustainability of batik business family was portrayed and analyzed through the lens of succession process proposed by Gersick (1997). According the concept that, generational change must go hand in hand with diversification and growth. The research aims (1) to explore succession process by their experience, (2) to know how the background and motivation of batik entrepreneur to manage their industry. We used qualitative approach to study the three succession cases: The data collection working by observation, interview and documentation. The result show that succession occurred by two models: unplanning and planning succession. Every model has such consequence toward resources that they have before, like social and material capital, and the knowledge of business management. Overall these findings provide the evidence that small-medium batik business family applied the succession process in different models.

Keyword: business succession, family business, small-medium batik industry.

We used qualitative approach to study the three succession cases: The data collection working by observation, interview and documentation. The result show that succession occurred by two models: un planning and planning succession. Every model has such consequence toward resources that they have before, like social and material capital, and the knowledge of business management. Overall these findings provide the evidence that small medium batik business family applied the succession process in different models.

Keyword: business succession, family business, small-medium batik industry.

I. Latar Belakang

Di Kota Pekalongan, usaha batik yang dijalankan oleh keluarga muslim umumnya memberikan estafet kepemimpinan secara turun-temurun. Oleh karenanya sering terjadi tumpang tindih antara bisnis, keluarga dan kepemilikan yang berimbas pada keberlangsungan usaha. Menjaga keberlanjutan industry batik ini harus dilakukan sebab sebagian besar usaha batik mampu menyerap tenaga kerja dalam jumlah banyak. Artinya ketika bisnis tidak bisa bertahan maka yang kehilangan penghidupan bukan hanya pemiliknya saja, melainkan semua pekerja akan mengalami hal yang sama. Jumlah usaha batik di Kota Pekalongan dapat dilihat pada tabel berikut:

<table>
<thead>
<tr>

<tbody>
<tr>
<td>No.</td>
</tr>
<tr>
<td>1.</td>
</tr>
<tr>
<td>2.</td>
</tr>
<tr>
<td>3.</td>
</tr>
</tbody>
</table>
Para pengusaha batik sebagian besar beragama Islam. Keberadaan mereka hingga sekarang mengindikasikan adanya sebuah keberlangsungan usaha yang telah dilalui dalam rentang waktu yang cukup lama serta adanya kontribusi pengelolaan yang bisa dipastikan telah berlangsung secara turun temurun, baik secara langsung maupun tidak langsung. Hal ini mendorong peneliti untuk melakukan penelitian terkait dengan pilihan dan perencanaan suksesi pengelolaan bisnis batik pada level individu/ personal, keluarga/ relasional dan level perusahaan/ organisasi.

Persoalan bisnis batik di Kota Pekalongan tidak hanya menyangkut masalah ekonomi, melainkan juga menyangkut masalah budaya, sosial dan agama. Pribadi pengusaha yang notabene muslim sangat tepat diteliti untuk menemukan pola kontribusi pengetahuan agama bagi sebuah organisasi usaha dari mulai level personal yaitu para predecessor dan successor, level relasional yaitu antara kedua belah pihak dengan para anggota keluarga serta level organizational behavior dengan melihat perilaku para successor dalam mengelola bisnis. Seringkali peneliti mendengar pendapat bahwa dalam bisnis keluarga generasi pertama adalah generasi perintis usaha, generasi kedua adalah generasi yang membesarkan bisnis keluarga dan generasi ketiga adalah generasi yang menghancurkan bisnis keluarga. Tentu pendapat semacam ini tidak serta merta benar adanya. Oleh sebab itu peneliti terdorong untuk meneliti apa yang sebenarnya terjadi dalam kelangsungan bisnis keluarga batik khususnya di Kota Pekalongan. Faktor sumber daya manusia, budaya, fluktuasi pasar, manajemen serta kemungkinan faktor lainnya bisa mempengaruhi arah sukses hingga keberlangsungan bisnis
pun ikut terpengaruh. Berhasil tidaknya proses sukses ini akan mempengaruhi berhasil atau tidaknya manajemen bisnis keluarga. Dengan kata lain usaha batik juga ditentukan proses sukses. Banyak perusahaan tidak membuat perencanaan masa depan. Mereka sulit menentukan strategi yang sukses, hal ini menyebabkan bisnis mereka berhenti berkembang, seperti yang dinyatakan Ward (1987) ...many family firms do not plan for the future. They become fixated on a previously successful strategy, which ultimately causes their businesses to stop growing. (Kellermans et.al, 2004: 211).

II. Kajian Pustaka
Gersick (1997) menggambarkan tentang kedudukan suksesi dalam bisnis keluarga sebagai "one reason succession is so challenging is that the generational change in the family often coincides with, or even triggers, important changes in the business" (Berkel, 2007: 21). Dari pemyataan tersebut bisa dipahami bahwa suksesi dalam bisnis keluarga merupakan peristiwa penting yang akan mengubah bisnis. Karena sangat penting seperti Gallo et.al. (2003) menyebutkan bahwa "...for the balanced development of a successful family firm, generational change must go hand in hand with diversification and growth" (Berkel, 2007: 21). Dari pemyataan terakhir suksesi merupakan komponen yang sangat penting bahwa demi sebuah keseimbangan pengembangan bisnis keluarga yang sukses, maka perubahan generasi harus berpindah dari generasi yang satu ke generasi yang lain dengan adanya perbedaan dan pertumbuhan bisnis.

Dalam rangka memahami suksesi pada bisnis keluarga, terlebih dulu harus dimengerti system bisnis keluarga dan para stakeholder atau pihak-pihak yang terkait dan membangun system tersebut. Bisnis keluarga memiliki fitur yang unik seperti komitmen, nilai-nilai yang disepakati bersama, budaya, kepercayaan, reputasi dan sebagainya. Hal-hal ini menjadi sumber-sumber strategis dan kapabilitas yang bakal terjadi dalam waktu jangka panjang (Suarez, et.al. 2001: 38).

III. Metode Penelitian

Penelitian ini bertipe kualitatif-deskriptif-eksploratorif, di mana peneliti mengeksplorasi dan mendekripsikan kepada pembaca tentang fenomena suksesi yang terjadi pada bisnis batik yang dikelola oleh keluarga di Kota Pekalongan. Pendekatan kualitatif sangat diperlukan agar diperoleh data yang komprehensif dan mendalam, terutama mengenai cara pengusaha memahami bisnis batik, bagaimana pengusaha menjalankan manajemen kepemimpinan usaha, budaya atau kultur yang membentuk pola suksesi, keyakinan atau prinsip moral, tatanan sosial, ekonomi-politik dan sebagainya.

Sumber data primer pada penelitian ini adalah 3 pengusaha batik yang beragama Islam. Usaha batik telah dijalankan kurang lebih 20 (dua puluh) tahun dengan alasan, kurun waktu tersebut memungkinkan bahwa proses suksesi pemah terjadi. Pemilihan pengusaha atau predecessor dilakukan dengan pendekatan purposive sampling untuk meyakinkan bahwa informan penelitian ini benar-benar memberikan informasi bagi penyusunan suksesi.
Adapun sumber data sekunder adalah referensi dan dokumentasi yang berisi teori tentang sukses bisnis, bisnis keluarga, serta planned behavior theory.

Data dikumpulkan dengan menggunakan teknik wawancara mendalam (in-depth interview) kepada pengusaha batik sebagai predecessor terutama mengenai upaya mereka dalam membuat perencanaan sukses, dokumentasi, yaitu teknik pengambilan data dari berbagai sumber tertulis seperti data jumlah industri batik di Kota Pekalongan yang dikeluarkan Dinas Perindustrian dan Perdagangan Kota Pekalongan tahun 2012, serta buku dan jurnal yang membahas tema sukses bisnis dan bisnis keluarga. Ketiga adalah observasi, teknik ini digunakan untuk mengambil data-data tertentu berkenaan keberadaan usaha para informan. Data yang ada dianalisa dengan pola sirkular antar kasus yang ada yaitu kemampuan predecessor dalam membuat perencanaan sukses serta anggota keluarga sebagai successor.

IV. Hasil

kedua, Shela yang menempuh kuliah desain interior di Jakarta dan ketiga Zaka yang baru saja memasuki masa kuliah di fakultas Hukum di Universitas Pekalongan.

V. Pembahasan

Tersedianya capital, baik material maupun sosial.

mem memiliki banyak sumber-sumber capital yang sayang untuk disia-siakan, baik modal finansial, modal sosial, modal pasar, alat-alat produksi serta ketenagakerjaan. Meski merasa terpaksa menerima estafet kepemimpinan, namun akhirnya Hj Eny bisa membesarkan usaha keluarga hingga saat ini.

Berbeda dengan Husein Assegaf, yang tidak dilahirkan dan dibesarkan di kalangan keluarga pebisnis batik, namun dorongan berdagang justru berkembang setelah melihat banyaknya potensi berbisnis batik Lingkungan masyarakat yang kebanyakan memiliki profesi mbabar batik di Pekalongan yang terkenal dengan biaya produksi yang murah menjadi aspek yang sangat menguntungkan bagi pengusaha pemula. Dengan relasi yang mudah dijangkau serta potensi Atikah yang menekuni dunia fashion yang sangat berkaitan dengan bisnis batik membuat beliau menjadi sangat yakin dengan keberhasilan bisnis batik. Tidak hanya itu jaringan sosial, organisasi hobi olahraga golf yang seringkali menjadi ajang berkumpulnya orang-orang kaya juga menjadi motivator untuk terus memperkenalkan usaha batiknya.

Pengetahuan tentang bisnis batik yang sangat memadai.

Sebagai pendiri usaha, motivasi diri lebih dominan dari pada pengetahuan usaha batik yang tidak secara turun temurun. Posisi Habib Husein sebagai predecessor sangat didukung oleh istrinya Zakiyyah dan anak sulungnya Atikah. Perencaan sukses telah dilakukan Habib

Pada observasi kepada tiga usaha batik ditemukan bahwa para owner yang menjadi obyek penelitian ini merangkap sebagai founder atau predecessor melimpahkan kepemimpinan perusahaan dengan tidak selalu melakukan perencanaan suksesi mereka kepada successor.

Gambar 1. Proses Suksesi Pada Bisnis Batik Pekalongan

VI. Kesimpulan

Dari aspek pembahasan, ada beberapa kesimpulan yang dapat peneliti sampaikan yaitu:

Pada observasi ketiga usaha batik ditemukan bahwa para owner yang menjadi obyek penelitian ini merangkap sebagai founder atau predecessor melimpahkan kepemimpinan perusahaan dengan tidak selalu melakukan perencanaan suksesi mereka kepada successor.

Pada perusahaan batik Larisa, peralihan ke generasi berikutnya yaitu kepada Nanin dan Larisa juga terjadi secara kultural. Bidang keilmuan yang mereka tekuni juga tidak mencerminkan adanya proses perencanaan, terbukti dengan bidang ilmu yang Nanin tekuni adalah psikologi dan Larisa mempelajari dunia arsitek. Meski demikian faktor kultur nampaknya lebih kuat mempengaruhi motivasi kedua putri tersebut untuk menekuni dunia bisnis batik keluarganya.

Jika pada perusahaan batik B.L. Putra peralihan pengelolaan yang dialami Hj Eny terjadi secara kultur juga, tetapi proses perencanaan mulai terjadi ketika Adit, putra beliau yang pertama menekuni ilmu ekonomi manajemen dan Shela, putri kedua menekuni ilmu desain interior, dua bidang yang menjadi andalan perusahaan batik B.L. Putra yaitu bisnis batik dan dekorasi. Meski tidak menyatakan secara terang-terangan bahwa kedua putri adalah penerus bisnis ini tapi dari kedua bidang yang menjadi tumpuan perusahaan ini bisa dipahami bahwa memang Hj. Eny sedang melakukan proses suksesi.

Begitu juga pada usaha batik Huza, Habib Husein selaku generasi pertama secara kolaboratif telah menempatkan Atikah, putri sulungnya bukan hanya sebagai anak tetapi sebagai relasi yang secara proporsional sangat mempengaruhi perkembangan bisnis batik keluarganya. Dengan diserahkannya urusan desain produk batik kepada Atikah menunjukkan bahwa secara sengaja Habib Husein telah membuat perencanaan suksesi secara terstruktur, mulai dari bidang ilmu yang ditekuni serta pelibatan Atikah dalam proses-proses pengambilan keputusan terkait dengan pengembangan usaha.
VII. Saran

Dari penelitian ini, ada beberapa saran yang peneliti ajukan:

Untuk kepentingan praktis, penelitian semacam ini perlu disosialisasikan dan menjadi rekomendasi bagi para pengusaha batik untuk memperbaiki proses suksesi secara terstruktur dan terencana agar usaha batik yang dikelola berkembang lebih cepat dan memiliki tata kelola yang lebih mapan, seperti halnya telah disebutkan pada kajian pustaka sebelumnya. Bagi para akademisi, penelitian empiris seperti pada usaha batik menginspirasi agar lembaga perguruan tinggi terus membangun koneksi dengan melakukan penelitian serupa hingga menghasilkan kontribusi keilmuan berdasarkan fakta-fakta di lapangan.
